

# STABILIZED NITROGEN (Powder)

HYDREXX® professional nitrogen stabilizer is an innovative additive that gives turfgrass professionals complete control and flexibility over their turfgrass programs. It allows for the stabilization of urea-based nitrogen (N) sources and the custom management of rates to efficiently provide the needed plant response from a few weeks to months per application.

## PRODUCT BENEFITS

The customization of HYDREXX® nitrogen stabilizer allows applicators to adjust rates to match specific soil and environmental conditions. Whether it is a heavier or sandier soil, the rates and longevity are determined by the applicator.

- For use with liquid urea, urea ammonium nitrate (UAN) and ammonium sulfate solution
- Dependable performance across varying soil conditions (e.g. pH, temperature, moisture)
- Extended, consistent turfgrass response with exceptional color
- Can be tank-mixed with many turfgrass protection chemicals
- Custom control over rate and length of performance
- Environmentally responsible with low potential for leaching, denitrification, runoff or volatilization
- Stabilizes urea fertilizer so it is held in the most efficient, ammonium form

**Industries:** Lawn Care, Golf, Sports Turf

## DUAL-INHIBITOR TECHNOLOGY

Adding HYDREXX® nitrogen stabilizer to a urea-based spray solution helps to make turfgrass fertilizer application more efficient.
